## EDUCATION

**Bulacan State University - BS Information Technology**

2020-2025

*Relevant Coursework:* Software Engineering, Database Systems, Artificial Intelligence

---

## WORK EXPERIENCE

**Crystal Vision** - Software Engineer / QA Tester | Remote

Aug 2025 - Present

### Rola Access Platform (Full Stack)

- Architected and optimized a modular NestJS 11 backend on Node.js and MySQL (Sequelize), combining controller-service-repository domain ownership with JWT/Passport security, strict DTO validation, throttling, and indexed cursor pagination to deliver scalable, high-performance admin APIs across auth, moderation, payments, contests, and analytics.
- Built an API-first Next.js 16 admin frontend with React 19, TypeScript, and RTK Query, integrating typed clients, JWT refresh guards, and scalable cursor-based data flows.

### KOL Dashboard (Full Stack)

- Owned a Laravel 12 service-layer backend with RBAC, FormRequest validation, and relational schema design for secure referral, withdrawal, notification, and earnings workflows.
- Built scalable analytics pipelines with filtered pagination, CSV exports, OTP hardening, and pre-signed media proxying to improve reliability for admin and finance operations.

**G&F Auto Supply** - Fullstack Developer / QA Tester | Capstone Project

Aug 2024 - Nov 2024

- Architected and optimized a unified commerce backend with Node.js and PostgreSQL/Sequelize, implementing transactional POS/inventory workflows, payment and reservation pipelines, secure OAuth integration, and audit-backed admin analytics for scalable operations.

**Sniff sense-AI** - Fullstack Developer / QA Tester | Personal Project

December 2025 - Present

- Built a scalable backend using Node.js, TypeScript, Express, Sequelize, and PostgreSQL with layered architecture, JWT security, validation, logging, and optimized DB queries powering intelligent perfume recommendations
  - Engineered high-performance workflows for collection management, scent logging, and analytics, using indexing, raw queries, and efficient service abstractions to deliver fast, reliable, and production-grade API operations.
- 

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Java, SQL, HTML, CSS, PHP

**Frameworks:** React, Next, Angular, Molecular.js, Laravel, Tailwind, Node.js, Express.js, Laravel (Blade) NestJS, Redux Toolkit, RTK Query, Sequelize, Prisma, Passport.js, Jest, Playwright, Pest, PHPUnit

**Developer Tools:** Git, GitHub, Bash, Visual Studio Code, Jira, Docker, Postman, DevOps
