WORK EXPERIENCE

Crystal Vision - Software Engineer / QA Tester | Remote

Aug 2025 - Present

Rola Access Platform (Full Stack)

- Built an API-first Next.js 16 admin frontend with React 19, TypeScript, RTK Query, and JWT guards, enabling scalable and type-safe enterprise admin operations.
- Architected a modular NestJS 11 backend with Node.js, MySQL, Sequelize, JWT security, and indexed cursor pagination, delivering scalable, high-performance APIs for authentication, moderation, payments, contests, and analytics.

KOL Dashboard (Full Stack)

- Engineered a Laravel 12 service-layer backend with RBAC, FormRequest validation, and relational schema design, ensuring secure and scalable referral, withdrawal, notification, and earnings workflows.
- Developed analytics pipelines with filtered pagination, CSV exports, OTP hardening, and media proxying, improving reliability and operational efficiency for admin and finance operations.

Smart-lift AI - Software Engineer (Full Stack/ QA Tester | Personal Project

March - Present

- Developed a full-stack fitness platform using Next.js 16 and NestJS 11 with JWT authentication and role-based access control, delivering scalable training, nutrition, and analytics workflows.
- Architected a modular NestJS backend with Prisma and MySQL featuring DTO validation, transactional service layers, and rule-driven business logic, enabling scalable workout planning, progression tracking, and nutrition analytics.
